No. 81-75

TITLE/SIGNIFICANCE:

Probable Flogger Armament Calibration Site

COMMENT: The probable armament calibration site is believed to be used to boresight AAM rails and aircraft cannon on the Flogger B. The site consists of (A) a device with two discs which is probably used to boresight the Flogger AAM rails, (B) a pole which could be used to line up the calibration discs with the AAM rails, (C) a revetment containing a billboard-type object which may be used to boresight the aircraft cannon.
